

The MSCPT is a welded hanger designed to carry up to three trusses intersecting at one point into a double ply girder truss. The top flange is notched at the center to accommodate vertical and diagonal web members in the girder truss.

MATERIAL: Top flange—3 gauge; stirrup—11 gauge (MSCPT2, MSCPT2N), 7 gauge (MSCPT2-2, MSCPT2-2N).

FINISH: Simpson gray paint.

INSTALLATION: • Use all specified fasteners. See General Notes.

- The total load must be evenly distributed about the centerline to avoid eccentric loading.
- All multiple members must be fastened together to act as a single unit.
- Minimum vertical carrying member sizes are 2x6 for MSCPT2 and MSCPT2N, and 2x8 for MSCPT2-2 and MSCPT2-2N.
- Minimum carrying member bottom chord is 2x6.

OPTIONS: • H_1 and H_2 may be increased for alignment with larger bottom chords.

- Hip stirrups can be skewed to 45°.
- The W_1 and W_2 of the MSCPT2 may be increased up to 37/16", provided the stirrups' configuration remains symmetrical.

CODES: See page 8 for Code Listing Key Chart.

Model No.	Dimensions			Fasteners		Doug-Fir-Larch/So. Pine Allowable Loads ^{1,2}						Code Ref.

1. For MSCPT2 and MSCPT2-2 models, allowable hip loads are 0.40 x Total Loads, and Jack Loads are 0.20 x Total Loads.
2. Uplift loads include a 33% and 60% increase for earthquake or wind loading, with no further increase allowed; reduce where other loads govern.
